INTERIOR DESIGN

We create designs that are both aesthetically pleasing and practical taking in consideration factors like storage solutions, space, usage, durability of materials and safety. Our commitment is to provide your family with a home that's not only visually stunning but also a nurturing environment.

Project Phase One

- **In-Person Client Consultation**
- **Concept Development** – We learn about lifestyle, aesthetic and functional needs, translating these into a cohesive and personalized design vision and concept documentation.

Project Phase Two

- **Basic Interior Design Documentation + 3D Renderings** – We transform the initial design concept into detailed Basic "Interior Design" plans, elevations and specifications documents that precisely guide the construction and design process.

*Up to Three Reviews

Project Phase Three

- **Design Concierge** – A team to manage all orders. Personal Shopper with One (1) Showroom visits. Arranging delivery and Inspection of the items. Issue resolution with vendors.
- **Construction Period** – We assist your building team to execute the design plans by meeting with the Project Manager on the Opening Day of the project to ensure that the original design intent is preserved.
